

CNC WHEEL LATHE

LAUNCH SA

YOUR 1 STOP WORKSHOP SUPPLIER

PRECISION MACHINING

High-precision CNC technology for accurate and consistent wheel refinishing.

Eliminates wheel vibrations and improves balance.

VERSATILITY

Compatible with a wide range of wheel sizes and designs.

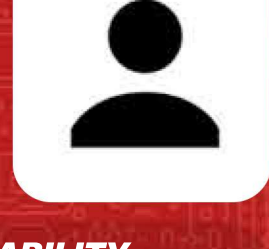

Ideal for alloy, steel, and composite wheels.

USER FRIENDLY

Rapid cutting and finishing speeds reduce repair time.

Minimizes material wastage for cost-effectiveness.

EFFICIENCY

Intuitive CNC control panel for easy operation.

User-friendly software for quick setup and customization.

DURABILITY

Robust construction for long-lasting performance.

Designed to withstand continuous use in busy workshops.

SPECIFICATIONS

| | |
|---------------------------------------|-------------------------------------|
| MAX TURN DIAMETER: 780 mm | HOLDER SIZE: 25*25 |
| MAX WHEEL SIZE: 28 inch | X-AXIS GUIDE WIDTH: 25mm |
| WHEEL HOLDER: three-jaw chuck | Y-AXIS GUIDE WIDTH: 30mm |
| SPINDLE SPEED: 0-3000 r/min | AXIS MOTOR TYPE: SERVO |
| CUTTING SPEED: 0.1-2500 mm/min | RAIL TYPE: IMPORT WIRE GUAGE |
| X-AXIS SPEED: 10000 mm/min | MOTOR POWER: 5.5KW |
| X-AXIS TRAVEL: 400mm | VOLTAGE: 3ph 380V / 1ph 220V |
| Y-AXIS SPEED: 18000 mm/min | POSITIONING ACCURACY: 0.01mm |
| Y-AXIS TRAVEL: 320mm | MACHINE SIZE: 1250*1325*1710 |
| HOLDER TYPE: Row tool holder | WEIGHT: 1600KG |

1.

Using laser detection, automatic processing, automatic cutter setting.

2.

Can Repair wheels up to 28 inches.

28 inch wheel

3.

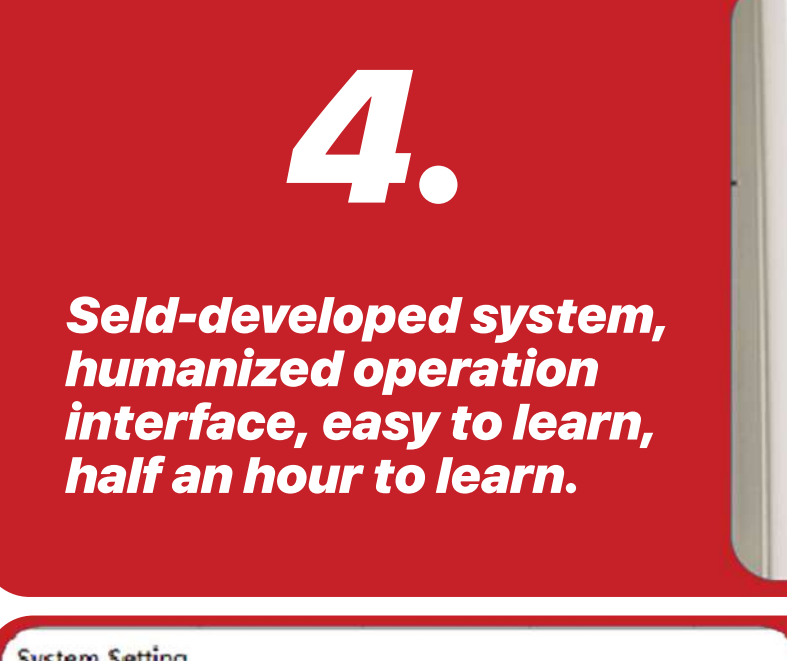

The vertical Structure makes the force more uniform and Elevates the difficulty of installing wheels
